DISCOVER THE DIFFERENCE

FEBRUARY 2012

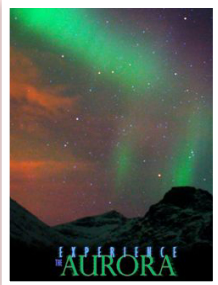

Over 150 Discovery Dome installations worldwide!

## PLANETARIUM SHOW NEWS

### NIGHT OF THE TITANIC

HMNS is updating their "Night of the Titanic" show, just in time for the 100th anniversary. You can watch the existing show in widescreen or fisheye using the link above. Existing customers can request the new version free, for just a format and media fee.

### EXPERIENCE THE AURORA

We now also offer in all single-projector formats the new Evans and Sutherland movie "Experience the Aurora". All sales get a special teachers packet about the aurora, and a copy of our Space Weather software CD.

## PARTNER UPDATE

We are excited to announce that Discovery Dome now has passed 150 installations worldwide, with 153 systems installed and 7 more in progress. The lucky 150<sup>th</sup> installation is Public VR in Pittsburgh ([http://publicvr.org/html/pro\\_ddome.html](http://publicvr.org/html/pro_ddome.html)). Kerry Handron will be running the rental program, which will include all her incredible active VR explorations, including "Ghosts of Tikal". She is getting a special free package of full-dome shows, including "We Choose Space" and "Happy Birthday From The Stars". These numbers do not include dome-only or shows-only sales.

We are especially proud of our repeat customers: *Kramer International* (4 systems); and with two each: *OMSI*; *AERO* (Dryden); *Starbase*; *Sesame St.* (PNC Bank); *Macon Museum* and *Davis School District*. A clickable map of our users (which does include some dome-only sales) can be found at <http://tinyurl.com/discdome>.

## PARTNER MEETING

We will have a Discovery Dome partners meeting at **IPS in Baton Rouge** on the afternoon of Sunday July 22 (place TBD). We will train on all the new software and hardware. Come see us in our Booth and in the Dome Village!

## HARDWARE UPDATE

Discovery Dome was recently featured in **Stereoscopy News!** We now offer in our mirror systems a new EPSON 3010 projector, which allows quick change from full-dome video to active 3D! You can show full 3D content by removing the Newtonian secondary mirror and zooming the projector out. The Epson is now a part of our standard package, with the price reduced to \$28,495. For an extra \$995 you can add either our 3D package (a copy of MediaWarp3D software and a 3D blu-ray player), OR, for a limited time, our newest show "We Choose Space".

## SOFTWARE UPDATE

Feature your shows outside your planetarium! We now have a kiosk touchscreen show display software application called **Marquee**. Let your visitors preview the shows before they see them! It uses a touchscreen for input and a second monitor for display, and runs on Windows and Mac OSX (not Lion). Only \$100 for the software for customers with a service contracts, or \$250 for others. We also have free downloads of our **Space Weather** educational museum exhibit module at

<http://spaceupdate.com/?software-download.html>

The 2012 edition of **Space Update** is available for sale: only \$10 for users under service contracts, \$29.95 for others.
