TOTALITY! ECLIPSE SHOW

The [Houston Museum of Natural Science](#), with major support from NASA HEAT and ePlanetarium, created a 24-minute full-dome show for eclipse of April 8, 2024 called **TOTALITY!**

The show is **FREE** with just a format fee, and highlights what solar and lunar eclipses are and how to observe them safely. Subtitle files (English and Spanish) are included for the hearing impaired, which can easily be shown using our MediaShow display software. The subtitle text files can be easily translated into other languages.

Portions of the show are being combined with images from the eclipse and also the recent May 11, 2024 solar storm into a new show entitled **SOLAR MAX - COMING SOON!**

The flatscreen version of **TOTALITY!** has no fee for K-12 schools without a planetarium; all formats are free for Discovery Dome customers.

More information about the show is online:

space.rice.edu/eclipse/eclipse_show.html

Fill out the request form to access all the show resources. We will send the license form and an invoice for the format fee, if any. Formats available up to 4K fisheye or 4K pre-warped.

TOTALITY! Request Form:

forms.gle/QT9pV1rwHxpaZUsDA

NOTE: We require usage metrics and do not allow further distribution without our agreement in writing:

FREE SHOWS

ePlanetarium has an extensive list of **FREE** shows that come **bundled with the purchase of a Discovery Dome system.**

Cosmology (Casper)
Exoplanets (Casper)
Flight Adventures (CMI)
Galaxies (Casper)
IBEX (Adler)
Incredible Sun (BRNO)

Journey to Mars (NASA)
Losing the Dark (Loch Ness)
New Horizons (Hartnell)
Saturn The Ring World (HMNS)
Voyage To Distant Worlds (Casper)

2K

Audio Universe * (ESO)
Dark (Scitech)
Dark Matter Mystery * (Laupheim)
Distant Worlds Alien Life * (ESO)
Europe To The Stars (ESO)
Forward To The Moon (Fiske)
From Earth to the Universe (ESO)
Hot and Energetic Universe (ESO)
Journey to the Centre of the Milky Way (ESO)

One Sky Project (NSF)
Out There (ESO)
Phantom of the Universe * (ESO)
Seeing! (Mirage3D)
The Sun Our Living Star (ESO)
Sunstruck * (MISCI)
Supermassive Black Holes * (ESO)
Two Small Pieces of Glass (ESO)
Unveiling The Invisible Universe * (ESO)

2K/4K

If you are not a Discovery Dome customer, we do charge a format fee for the pre-warped versions of the free shows (the fisheye versions you can get from the original producers).

* The shows with an asterisk require a signed license.

NEW 'PAINTED' DOME PROTOTYPE

We are excited to debut our new 'painted' portable domes. You can customize the exterior look for your company or site. The image shows a print-on-white vestibule and a print-on-black main dome.

This new dome was shown at the 2023 CAST meeting and will be at [Astronomy On The Mall](#) in Washington DC, Jun 22, 2024.

"Your eclipse program became the program of choice for delivering 4th grade science objectives regarding the moon, because in my opinion, it was the pick of the litter. The fact that we saved, potentially, many thousands of dollars we might have spent on any of the several planetarium products out there is an added advantage."

WHY CHOOSE DISCOVERY DOME?

Our mission is to create and distribute affordable and accessible educational technologies to inspire, engage, and educate

- We have the largest selection of domes in sizes from 4m to 10m, including semipermanent domes.
- We have display software that is powerful but easy to learn and use.
- We are the only portable planetarium company that creates planetarium shows.
- We are the ONLY woman-owned planetarium company, perfect for your grant applications.
- We are the ONLY planetarium company owned by an Astronomy professor.
- We use our very thin profit margin to support public education events, such as giving workshops at teacher conferences (NSTA, CAST, SEEC, ESIP) and bringing the Discovery Dome to public events such as the "Astronomy Night on the Mall" each June and to Hispanic students in South Texas yearly.
- We gave away 30,000 pairs of eclipse glasses for the 2017 eclipse and gave away another 35,000 for the 2023 and 2024 eclipses.

ECLIPSE & MOON MISSION ANIMATIONS

We are pleased to offer 10 FREE full-dome **eclipse animations** which show views of solar and lunar eclipses as seen from various viewpoints. In addition we also feature animations about the **Apollo** and upcoming **Artemis** moon missions.

Visit our [Planetarium Animation Request Form](#) to get access to all of our free animations.

EXPLORE ALL OUR SHOWS

Get info on and watch all our available shows on our website:

www.eplanetarium.com/shows.php

Many of our shows are available in numerous foreign languages. We have over 20 languages represented so far and are always looking for new vocal translations to offer. Every show and language we offer can be sampled via our language support page:

www.eplanetarium.com/support_languages.php

ePlanetarium is also working hard to add foreign language subtitles to all our shows. A listing of all available subtitle languages we have so far is on our subtitle support page:

www.eplanetarium.com/support_subtitles.php
